

Dear fellow acousticians,

It is our pleasure to invite you for our EAA TC meeting Computational Acoustics at Forum Acusticum in Krakow, at Thursday 12:45-14:15 in D1, room 103. Lunch will be provided.

The agenda of our meeting consists of two items:

- 1 Benchmarks for linear acoustics\*
- 2 Other matters (e.g. topics of sessions at upcoming meetings)

\*The chairs of the EAA TC Computational Acoustics have initiated a framework for benchmark problems in computational acoustics. A special session at Forum Acusticum is devoted to this initiative (Room 9, 17:00h at Wednesday 10 September), which is a result of the desire of many researchers wishing to set up benchmark cases in computational acoustics. The session is a kick-off meeting for a long term (voluntary) project about creation and collection of benchmarks in the entire field. It will be the major purpose of the project to collect benchmark cases for a variety of relevant categories and publish the results from different methods in a fair manner. Whereas the special session at Forum Acusticum contains the first scientific contributions, we will open our TC meeting for further discussions on how to proceed with this initiative.

All interested colleagues are warmly welcome,  
with best regards,

Maarten Hornikx  
Manfred Kaltenbacher  
Steffen Marburg
