

EUROREGIO 2016 and EAA Summer School on Acoustics

The EuroRegio 2016 (<http://www.spacustica.pt/EuroRegio2016/index.html>) will take place at the Faculty of Engineering of Porto University (FEUP), from 13 to 15 June 2016. This conference will be held together with the 9th Iberian Congress on Acoustics and the 47 Spanish Congress acoustics - TECNIACUSTICA® 2016 and will include an EAA Summer School and Meeting for Young Acousticians.

The Congress is jointly organized by the SPA and the SEA, in collaboration with FEUP, under the auspices of the EAA, and has the sponsorship of ICA (International Commission for Acoustics), and of the Portuguese National Laboratory for Civil Engineering (LNEC).

The Congress features almost 200 papers to be presented orally (http://www.spacustica.pt/EuroRegio2016/pdfs/Plano_sessoes_27_may.pdf), among which 3 plenary lectures deserve the utmost attention for they deal with the latest developments in the emergent areas (http://www.spacustica.pt/EuroRegio2016/english/plenary_lectures.html).

There is also one Workshop on Active Listening, as well as a technical exhibition of materials, products, equipment and services of innovative character (<http://www.spacustica.pt/EuroRegio2016/english/exhibition.html>).

With the support of Klaus Genuit Foundation, the Congress has also allowed participants to be candidate for the EAA Best Paper Award (http://www.spacustica.pt/EuroRegio2016/english/best_paper_award.html).

Previously, in association with the EuroRegio2016 (days 11 and 12, of June), there will be also held a Summer School on Acoustics (http://www.spacustica.pt/EuroRegio2016/english/summer_school.html), under the scope of EAA (European Acoustics Association) activities, which comprises 5 courses on applied acoustics and a more basic course addressed to students who are in the process of finalizing their graduation, and to those who have not had yet any contact with acoustics, in order to show them the potentialities and interest of this scientific area for the whole community.

To attend this Summer School some grants were attributed to candidates who have applied for them. These grants were funded by SEA (Spanish Acoustical Society), SPA (Portuguese Acoustical Society) and ICA.

Porto is a magnificent and astonishing city, with an historic Centre classified by UNESCO as a World Heritage Site in 1996. This city is proud to host their visitors with hospitality and a smile of hope in the future. Porto is looking forward to meet you!
