

## Acoustics '17

This conference takes place June 25-29 in Boston in co-operation with ASA and is promising to be a great success. There are a total of 2209 abstracts and 230 sessions over the 5 days and the number of pre-registrants are 1805 from 44 countries including 590 students. These numbers means that the meeting is one of the largest that EAA has been involved in. In particular the very large number of special sessions (~120) arranged in co-operation with one EAA and one ASA member is impressing. The success is to a large extent related to the excellent work done both by our ASA colleagues but also by the people involved from the EAA side like the EAA TPOC Philippe Blanc-Benon.

For more info about the conference and the technical program please visit:

<http://acousticalsociety.org/content/acoustics-17-boston>

Finally, I look forward to soon meet and welcome many of you in Boston.

Sincerely Mats Åbom, EAA co-chair.
