

SOUNDS OF MY PLACE - THE FILM

After the successful EAA INAD IN EUROPE 2017, that produced and distributed some remarkable original materials, a new short film "Sounds of my place" is under preparation.

One of the main result of EAA INAD IN EUROPE 2017 is a huge collection of drawings, audio and video clips, painted and recorded by students of primary and high schools from several countries, in the frame of the pan-European competition "Sound of my place".

A selection of these nice materials sent by EU students is now used to create a new video-film, assembling the most significant and representative ones with a new storyboard, linking drawings and recordings with proper text and musical contributions.

Management, storyboard writing, direction and filmmaking are done by the same group of acousticians and filmmakers that worked in INAD 2017 with the final supervision of EAA Board and Executive Council.

The Head-Genuit Foundation gives a precious support to the project.

The film should be ready to be shown at the next conferences (hopefully starting from Euronoise 2018) on Acoustics and distributed among the students of the EU schools connected to INAD before the end of the school year.
